Yami Terms of Service

Effective November 6, 2026

Your sports community

Yami lets you share workouts, follow athletes, join clubs and challenges, record activity and exchange private messages with mutual followers. Training videos are recordings. Live broadcasting and video calling are currently unavailable. Community content is not medical advice. Choose activity suitable for your health and seek qualified guidance when needed.

Your account and choices

One-tap sign-in creates a guest account. Keep access to the device and its saved session: a guest account cannot be recovered after signing out or losing that session. Use accurate profile information and only share media you have permission to publish. You are responsible for your activity and messages.

Community rules and content

Do not post illegal, abusive, sexually exploitative, hateful, threatening or misleading content. Do not harass people, impersonate others, share private information without permission or infringe intellectual property. Use Report to submit concerns and Block to stop interactions. Access or content may be restricted when necessary to protect the service or its users.

You retain rights to your content and allow Yami to store, display and deliver it to provide the features you use. Profiles and posts are public. Private messages are intended for their participants. Avoid posting confidential information publicly.

Purchases and Coins

Coins are consumable virtual items used for available in-app features. Apple processes purchases; the purchase screen shows the current localized price and exact Coins amount. Purchases do not renew automatically. Coins have no cash value and cannot be exchanged for money. Refund requests are handled through Apple under its applicable policies: https://support.apple.com/billing.

Purchase records and the Coins wallet are stored on this device. Reinstalling the app or using a different device does not guarantee recovery of consumable balances. An interrupted confirmed purchase remains pending until delivery can be recorded. Do not buy the same pack again just to resolve a pending delivery.

Changes, deletion and contact

Features may change or become unavailable. Settings includes account deletion; deleting the account removes its active profile and associated app records and retires its wallet. Legal obligations, service logs and backups may have separate retention requirements. Nothing here limits rights granted by applicable law.

Planned support contact: support@yami.app. This contact channel has not yet been confirmed active. Use the in-app reporting and account controls for their available functions.
